

What's in it for your clients?

Seamless integrations

Connect upstream and downstream applications in your client's ecosystem using Creator's prebuilt integrations.

Uncompromising security

Provide your clients with peace of mind, through advanced security features like two-factor authentication, IP restrictions, field-level security, and audit logs.

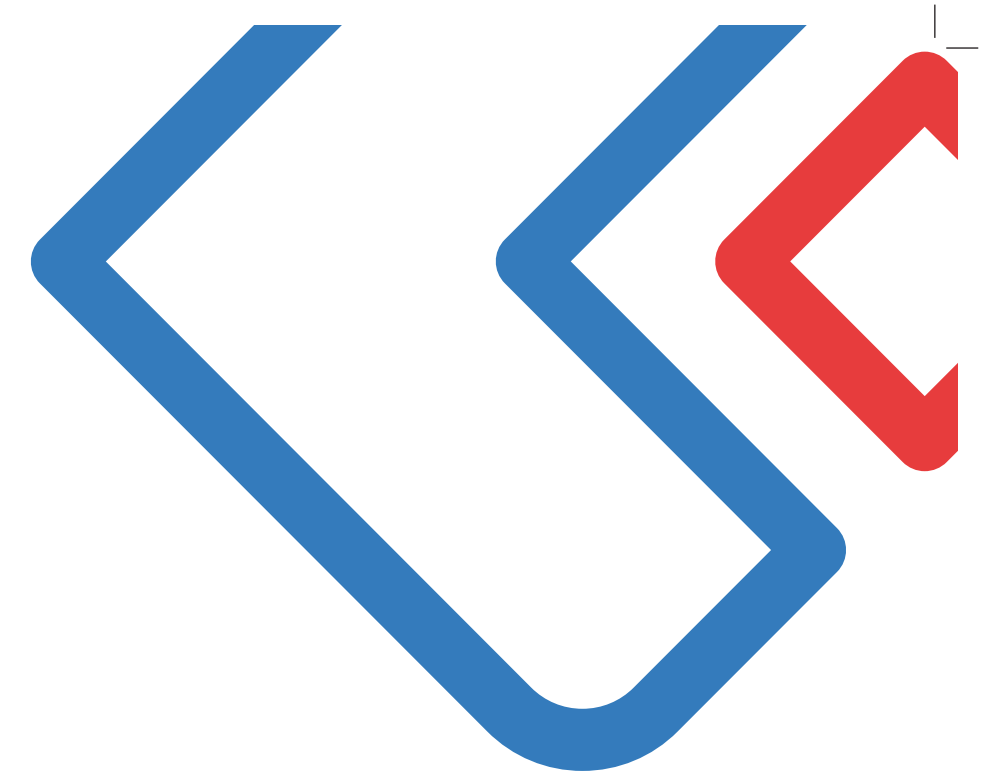

Pricing that suits everyone

Provide the freedom to scale as they grow by offering flexible pricing plans based on the features and user roles in your application.

White-labeled portals & mobile apps

Deliver a personalized experience to customers and vendors by allowing them to add brand elements to their applications.

ZOHO Creator

BUILD AND SELL CUSTOM SOLUTIONS

Zoho Creator is a low-code platform that helps you easily transform your industry acumen into multiplatform cloud applications

TAP INTO YOUR NEXT BIG BUSINESS OPPORTUNITY

Develop

Create custom solutions with a drag and drop application builder that can accommodate the business needs of your industry.

Deploy

Focus on solving real-world problems while Zoho handles sign-up, login, upgrades, billing, and security for you.

Distribute

Market tailored, white-labeled editions of your solution by adding a custom logo, domain, and design.

What's in it for you?

Create your own SaaS brand

Create your own SaaS brand through white-labeled web and native mobile apps. Use widgets and SDKs to customize the UI and UX for all the applications you build.

Multi-tenant applications

All apps are deployed through Zoho Creator's multi-tenant framework, which gives you the freedom to sell subscriptions to customers through different instances of the application, while also enabling quick, seamless updates.

Free sandbox to build and test

Create a duplicate version of your application in a sandbox to build and test features without interrupting existing users.

Quick access to 45 million users

Get your application to millions of Zoho customers worldwide through the Zoho Marketplace.

Complete payment processing

Focus on selling tailored versions of your application to customers while we manage the end-to-end payment process for you.
